

# ESG INDEX 2021

## **Measure** **of Risks** **For 179 countries**

The ESG Index is an efficient tool allowing one to quickly assess third-party risks in relation to three issue categories: the environment, human rights and health & safety. All three measures operate independently of the others and can also be considered as separate indexes.

Advanced research of relevant databases has allowed Global Risk Profile to offer maximum coverage for each sub-index :

- Environment 191 countries
- Human Rights 182 countries
- Health & Safety 185 countries

In addition, a global scoring is calculated for as many as 179 countries and territories.

The Environment sub-index is composed of air pollution and climate change measures (greenhouse gas emissions and trends), but also biodiversity and ecosystem health indicators.

Risk level related to Human Rights is notably measured according to the ratification status of 18 key conventions, social rights indicators (related to slavery, child labour, education, housing etc.), civil and political rights indicators (press freedom, minority rights, etc) and collective rights indicators (measures of peace, right to self determination etc.).

The last sub-index, Health & Safety, is characterized by health indicators (such as life expectancy, access to drinking water) and safety indicators (safety at work, social protection). An adjustment for spatial inequality (urban / rural) is also considered.

In total, 65 open source data variables that exclusively originate from internationally recognized entities were included.

Data were standardized and aggregated to a 0-100 scale, where 0 corresponds to the lowest risk and 100 corresponds to the highest risk, allowing users to evaluate and compare country results between them.

Evaluates **179** countries based on **65** carefully selected datasets that exclusively originate from **23** internationally recognized entities :

- WHO
- UN
- UNEP-WCMC
- Freedom House
- Walk Free Found.
- Fund for Peace
- UN Food & Agri.
- FAO
- ILO
- Global Initiative
- World Bank
- WEF
- Cato Institute
- Mongabay
- US Dep. of State
- Glob. Carbon Project
- Lloyd's Register Foundation
- Reporters sans Frontières
- European Environmental Agency
- Institute for Economics and Peace
- Conférence Syndicale Internationale
- Heidelberg Inst. for Int. Conflict Research
- Natural History Museum London

Low Risk  High Risk

Our measure consists of **3** sub indexes which can be considered independently:

- Environment
- Human Rights
- Health & Safety
